EDUCATION

Babu Banarasi Das Institute of Technology and Management

Bachelor of Technology (B. Tech)

Computer Science and Engineering

September 2021 - Present

Lucknow, Uttar Pradesh

- **Relevant Coursework:** Java, Data Structures and Algorithms, Software Engineering, Computer Network, Database Management System, Operating System, Web Designing

St. Thomas Mission School

Class XII (Percentage: 87%)

April 2020 - March 2021

Lucknow, Uttar Pradesh

St. Thomas Mission School

Class X (Percentage: 88.5%)

April 2018 - March 2019

Lucknow, Uttar Pradesh

TECHNICAL SKILLS

Languages: Java, JavaScript, C, Python

Technologies: Spring Boot, ReactJS, Bootstrap, Android SDK

Others: HTML, CSS, JPA, Hibernate, Software Development, Object Oriented Programming (OOPs), Data Structures and Algorithms (DSA), MySQL, Git, Github, Problem-solving

Soft Skills: Effective Communication, Team-Player, Leadership, Innovative

PROJECTS

CafeEase | Java, Spring Boot, MySql, ReactJs, Html, CSS, JavaScript

Backend Code | Frontend Code

- Developed a robust web-application using **Spring Boot** and **React.js**, simulating real-world cafe operations.
- Implemented authentication and authorization with **JWT**, ensuring a **100%** reduction in unauthorized access.
- Designed **RESTful APIs** for seamless management of **80+** products accross multiple categories by admin.
- Integrated a **Shopping Cart** feature, optimizing the order placement process for users.
- Automated the generation of PDF **bills for 50+ orders**, ensuring accurate and professional billing for users, making it Scalable.
- Enhanced user engagement by incorporating **email capabilities** for notifications and updates.
- Developed a responsive and interactive Frontend using React, enhancing user experience and interface design for the CafeEase product.

Locus Buzzer | Java, Android, SQLite

Project Link

- Architected, engineered, and implemented an application that allows users to set **location-specific alarms**.
- Utilized **GPS** technology to trigger alarms when users enter a specified range(min 20 meters), ensuring timely reminders.
- **Integrated map services** to enable users to select and view alarm locations effortlessly within **30 seconds**.
- Enhanced user experience with a clean UI and intuitive navigation.
- Designed the app to provide **timely, location-based** reminders, helping users who often forget tasks while on the move, ultimately driving higher engagement and adoption rates.

EXPERIENCE

Playraid Technologies

November 2024 - March 2025

Software Development Engineer Intern

Remote

- Developed a client portal for idea submission and request management, streamlining communication and workflow.
- Designed and implemented features for client tracking, request handling, and automated workflows, that would reduce manual effort by 30%.
- Utilized Spring Boot and MySQL to build a scalable and user-friendly platform.
- Collaborated with teams to improve portal functionality, enhancing efficiency in client management.

ACHIEVEMENTS

- Solved **450+** questions on various coding platforms like **Geeks For Geeks**, **Codechef**, **Leetcode**, **Hackerrank**, **Peppcoding**.
- One of the **top 5%** of students in the batch of 180, securing a coveted FW (Fee Waiver) seat in college based on performance in JEE Mains.
- Ranked in the **top 13%** among global coders on **Leetcode**
